

Storm Data and Unusual Weather Phenomena - May 2013

Location	Date/Time	Deaths & Injuries	Property & Crop Dmg	Event Type and Details
ILLINOIS, Central				
CASS COUNTY --- 8.1 NNE BEARDSTOWN [40.13, -90.37], 0.8 ENE BEARDSTOWN [40.02, -90.42], 4.0 SW BEARDSTOWN [39.99, -90.49], 7.1 W HAGEN [39.92, -90.53], 10.1 WSW HAGEN [39.86, -90.58], 5.0 WSW BEARDSTOWN [39.99, -90.52], 0.3 NW BEARDSTOWN [40.02, -90.43], 5.5 NNE BEARDSTOWN [40.09, -90.39]				
	05/01/13 00:00 CST	0		Flood (due to Heavy Rain)
	05/22/13 19:15 CST	0		Source: Emergency Manager

High impact flooding on the Illinois River continued from April . Several structures southwest of Beardstown in rural parts of Cass County were damaged by record levels of flooding on the Illinois River. The flood wall in Beardstown, however, spared the city for significant damage. Agricultural land and several roads adjacent to the river were also damaged. High impact flooding subsided when the river level at Beardstown fell below a stage of 18 feet on May 22nd. Damage estimates for the buildings, agricultural land and roads were not available for this event.

FULTON COUNTY --- 1.5 E BANNER [40.52, -89.87], 2.9 E BANNER [40.52, -89.85], 4.5 SE SEPO [40.30, -90.06], 3.6 S MARBLETOWN [40.18, -90.20], 3.3 SSW MARBLETOWN [40.19, -90.22]				
	05/01/13 00:00 CST	0		Flood (due to Heavy Rain)
	05/19/13 16:30 CST	0		Source: Emergency Manager

High impact flooding on the Illinois River continued from April .

No homes were damaged by record levels of flooding on the Illinois River. However, thousands of acres of agricultural land and nature reserves were inundated by the flood waters. Several roads along the river were also damaged. High impact flooding subsided when the river level at Havana fell below a stage of 17 feet on May 19th.

Damage estimates for the roads and agricultural land were not available for this event.

MARSHALL COUNTY --- 2.2 NNE HENRY [41.15, -89.35], 2.9 NE HENRY [41.15, -89.33], 2.0 E HENRY [41.12, -89.33], 1.2 NNW LACON [41.04, -89.41], 5.9 WSW WILBERN [40.92, -89.42], 7.6 S SPARLAND [40.92, -89.45], 2.8 NNE SPARLAND [41.07, -89.43]				
	05/01/13 00:00 CST	0		Flood (due to Heavy Rain)
	05/09/13 09:00 CST	0		Source: Emergency Manager

Record flooding on the Illinois River continued from April into May .

More than 30 homes and businesses along the Illinois River in Marshall County suffered flood damage due to record river levels . The high impact flooding dissipated on May 9th when the river level at Henry dropped below a stage of 24 feet.

Damage information was reported in the April Storm Data for this episode .

MASON COUNTY --- 0.3 SE HAVANA [40.30, -90.07], 0.2 SE PATTERSON BAY [40.15, -90.18], 5.1 W SNICARTE [40.12, -90.33], 0.2 SSW HAVANA [40.30, -90.07], 4.0 NNE BUZZVILLE [40.42, -89.95], 5.0 NNW BISHOP [40.42, -89.91]				
	05/01/13 00:00 CST	0		Flood (due to Heavy Rain)
	05/19/13 16:30 CST	0		Source: Emergency Manager

High impact flooding on the Illinois River continued from April .

Hundreds of cabins and sheds in wildlife areas along the Illinois River were severely damaged by the floodwaters. In addition, 25 homes and several other structures were damaged near Bath, Snicarte, Havana and Goofy Ridge. Nearly 15 miles of roads were destroyed due to the flooding. High impact flooding subsided when the river level at Havana fell below a stage of 17 feet on May 19th.

Damage estimates were reported in the April Storm Data for this event.

MORGAN COUNTY --- 3.4 NNW MEREDOSIA [39.88, -90.59], 0.4 E MEREDOSIA [39.83, -90.56], 3.2 SSW MEREDOSIA [39.79, -90.59], 1.8 SSW MEREDOSIA [39.81, -90.58], 0.1 NNE MEREDOSIA [39.83, -90.57], 2.6 NNW MEREDOSIA [39.87, -90.59]				
	05/01/13 00:00 CST	0		Flood (due to Heavy Rain)
	05/14/13 17:00 CST	0		Source: Emergency Manager

High impact flooding on the Illinois River continued from April . A few structures in rural parts of extreme northwest Morgan County were damaged by near record levels of flooding on the Illinois River. The flood wall in Meredosia, however, spared the city from significant damage. Agricultural land and several roads adjacent to the river were also damaged. High impact flooding subsided when the river level at Meredosia fell below a stage of 22 feet on May 14th. Damage estimates for the buildings, agricultural land and roads were not available for this event.

High impact flooding on the Illinois River continued from April .

Around 276 homes, two businesses, a fire station and numerous roads along the Illinois River in Spring Bay and Bay View Gardens were inundated , and suffered flood damage dur to record river levels . High impact flooding subsided when the river level at Peoria fell below a stage of 22 feet on May 8th.

Damage information was reported in the April Storm Data for this episode .

High impact flooding on the Illinois River continued from April into much of May. Excessive rainfall during the middle of April led to widespread flooding across a large part of northern and central Illinois and resulted in record flooding along the Illinois River in central Illinois. Another heavy rain event from May 2-4, 2013 prolonged the flooding into the middle of May for most of the Illinois River basin.

The record flooding did significant damage to locations along and near the river banks. Every county along the Illinois River was declared a state and federal disaster area.

Storm Data and Unusual Weather Phenomena - May 2013

Location	Date/Time	Deaths & Injuries	Property & Crop Dmg	Event Type and Details
MOULTRIE COUNTY --- 0.6 SSE FAIRBANKS [39.71, -88.53]				
	05/02/13 12:05 CST		24K	Thunderstorm Wind (EG 52 kt)
	05/02/13 12:10 CST		0	Source: Law Enforcement
Four power poles were blown down along Illinois Route 133 about 3 miles west of Arthur. People were trapped in cars by the downed lines: however, no injuries were reported.				
COLES COUNTY --- 3.8 WSW FAIRGRANGE [39.55, -88.23], 2.1 SSW FAIRGRANGE [39.55, -88.18], 0.6 SE CAMPBELL [39.39, -88.21], 2.1 SW LERNA [39.40, -88.31], 0.9 WSW (MTO)MATTOON/CHRLSTN [39.47, -88.29]				
	05/02/13 15:00 CST		0	Flash Flood (due to Heavy Rain)
	05/02/13 18:30 CST		0	Source: Emergency Manager
A slow moving thunderstorm produced more than 2.00 inches of rain in one hour in a small part of central Coles County, between Mattoon and Charleston. The flash flooding was relatively short lived, but numerous rural roads were inundated and impassable.				
CUMBERLAND COUNTY --- 1.9 SW JOHNSTOWN [39.35, -88.31], 3.3 SE JANESVILLE [39.35, -88.20], 2.0 SSE WALLA WALLA [39.17, -88.19], 4.7 WSW WOODBURY [39.17, -88.36]				
	05/02/13 16:45 CST		0	Flash Flood (due to Heavy Rain)
	05/02/13 21:00 CST		0	Source: Law Enforcement
A slow moving thunderstorm produced more than 3.00 inches of rain in 90 minutes in a small part of central Cumberland County, between Mattoon and Charleston. The flash flooding was relatively short lived, but numerous streets in Toledo, as well as rural roads, were inundated and impassable.				
A cold front stretching from the Great Lakes to the Southern Plains served as the focusing mechanism for scattered showers and thunderstorms across central Illinois during the afternoon of May 2nd. One cell became severe across Moultrie County, producing wind damage west of Arthur, and two other slow moving thunderstorms resulted in flash flooding in Coles County and Cumberland County.				
COLES COUNTY --- 4.0 WSW OAKLAND [39.63, -88.10]				
	05/09/13 13:25 CST		60K	Thunderstorm Wind (EG 70 kt)
	05/09/13 13:30 CST		0	Source: Emergency Manager
A pole barn was damaged and shingles were torn off homes nearby.				
CLAY COUNTY --- 2.0 W INGRAHAM [38.83, -88.37]				
	05/09/13 16:30 CST		0.10M	Lightning
	05/09/13 16:31 CST		0	Source: Emergency Manager
Ten oil tank batteries were ignited by a lightning strike west of Ingramham.				
CHRISTIAN COUNTY --- 2.5 N OWANECO [39.52, -89.19], 3.0 N OWANECO [39.52, -89.19]				
	05/09/13 16:41 CST		0	Tornado (EF0, L: 0.55 mi , W: 20 yd)
	05/09/13 16:42 CST		0	Source: Emergency Manager
A tornado touched down in a field 2.4 miles north of Owaneco at 4:41 PM CST. The tornado traveled northward, then lifted 2.9 miles north of Owaneco at East 1200 North Road at 4:42 PM CST. No damage was reported.				
Low pressure tracking out of the Plains was responsible for scattered thunderstorms across central Illinois during the afternoon and evening of May 9th. One storm produced wind damage to a few structures in rural Coles County, while another caused a lightning strike and ensuing fire in Clay County. Yet another cell produced a brief tornado in an open field in Christian County.				
TAZEWELL COUNTY --- CREVE COEUR [40.65, -89.58]				
	05/20/13 18:39 CST		4K	Thunderstorm Wind (EG 52 kt)
	05/20/13 18:44 CST		0	Source: Mesonet
A tree was blown onto a fence.				
WOODFORD COUNTY --- ROANOKE [40.80, -89.20]				
	05/20/13 18:45 CST		12K	Thunderstorm Wind (EG 52 kt)
	05/20/13 18:50 CST		0	Source: Emergency Manager
A few small trees were blown down in Roanoke.				
PEORIA COUNTY --- 1.3 ESE SHERWOOD FOREST [40.74, -89.61]

Additional rainfall overnight kept many of the roads closed through the morning. The flooding subsided by early afternoon.

A slow-moving warm front brought several rounds of showers and thunderstorms to central Illinois from May 25th through May 27th.

The heaviest rainfall of between 2 and 6 inches occurred along and west of the Illinois River Valley. As showers and thunderstorms re-developed across the area during the evening of May 26th, high rainfall rates on top of already saturated soil led to flash flooding of many locations across west-central Illinois.

A large tree was blown down in Monticello.				
A cluster of thunderstorms developed across Iowa, then tracked southeastward along a warm front into central Illinois during the afternoon of May 27th. Some of the storms became severe, producing damaging winds in excess of 70 mph across portions of northern Sangamon into western Macon counties. The most widespread wind damage occurred near the town of Riverton, where numerous mobile homes suffered damage from falling trees.				
KNOX COUNTY --- 2.9 NW RIO [41.15, -90.44], 6.3 NNE CENTERVILLE [41.15, -89.99], 4.7 SSE CENTERVILLE [41.01, -90.00], 1.9 SSW (GBG)GALESBURG ARPT [40.90, -90.44]				
	05/28/13 17:30 CST		1M	Flash Flood (due to Heavy Rain)
	05/28/13 23:30 CST		0	Source: Emergency Manager
Thunderstorms with torrential rainfall produced nearly 3.00 inches of rain in just one hour. Due to the already saturated ground, much of this additional rainfall rapidly caused flash flooding in the northern half of Knox County. The city of Galesburg was impacted the greatest. Rapidly rising water on many city streets led to at least 30 stranded motorists and one water rescue. Water flooded parts of Carl Sandburg College as well, causing nearly \$300,000 in damage to flooring, furniture, and equipment. Numerous homes and businesses also sustained considerable flood damage.				
Nearly all rural roads in the northern half of Knox County were closed due to the flooding.

	05/31/13 00:30 CST	0		Flood (due to Heavy Rain)
	05/31/13 13:00 CST	0		Source: Law Enforcement
A band of thunderstorms with heavy rain produced more than 2.00 inches of rain in 90 minutes during the evening of May 30th. The greatest impact was on roads near the La Moine River, which became inundated and were closed from late evening into the night. Several rural roads between Rushville and the La Moine River were also flooded and impassable in spots. Additional rainfall during the very early morning hours of May 31st kept many roads closed in southern Schuyler County. The flooding subsided by early afternoon on May 31st.				
A slow-moving storm system brought showers and thunderstorms to central Illinois during the afternoon and evening of May 30th. Some of the storms became severe, producing damaging wind gusts in excess of 60 mph and locally heavy rainfall. Isolated flash flooding occurred in areas where persistent rains fell on very saturated ground.

A tree was blown down 3 miles south of Claremont.				
An approaching cold front brought showers and thunderstorms to central Illinois during the evening of May 31st. Many of the storms became severe, producing widespread wind damage across the area. Two tornadoes briefly touched down as well. The first tornado occurred in Decatur in Macon County, while the second one touched down just southeast of Westville in Vermilion County. In addition, excessive rainfall rates of 2 to 3 inches per hour associated with some of the storms produced localized flash flooding that lingered into the morning hours of June 1st.
